Monero Privacy Hub Architecture

Unlinkable On-Chain

Leg 1: Inbound

Public Ledger

BTC Receive BTC

Single-use deposit address generated. Mempool monitored.

Zero-Knowledge Pivot

XMR Hub

XMR RingCT & Stealth Hop

Cryptographically severs input & output transaction graphs.

Leg 2: Outbound

Clean Payout

SOL Deliver SOL

Delivered directly to user destination without prior trace.

Zero User Logs • Ephemeral Sessions

Auto-purged post settlement

Strictly Zero-KYC

No registration, no accounts, no KYC verification. Ephemeral order sessions and auto-purging data shredder keep your activity anonymous.

Competitive Pricing

Single hops at 0.45% and full double-hop privacy routes at 0.75% all-in. Beats industry competitors charging 1.0% to 1.8%.

Top 10+ Native Blockchains

Native support for Bitcoin, Ethereum, Monero, Solana, USDT, USDC, BNB, Ripple, Litecoin, and Dogecoin with automatic mempool monitoring.

CoinSwag Privacy Hub Engine • Automated Multi-Chain Decentralized Liquidity • No KYC Ever
